From Director's Desk

I take this opportunity to share R.E.D. vision and its relevance in the prevalent situation in the society.

VISION: To create student learning and human growth that fosters sustainable communities that are caring and ethical.

In nutshell we strongly believe in following:

1. Every child is a winner, at RED we help him find his calling and realize his dream
2. Responsible citizens, walking out of the corridors of RED by virtue of a strong value of our system **ETHICAL CARING**

Since this project is very close to my heart, so onus is upon me that this becomes a shared vision of every person who directly or indirectly is serving children, entrusted in our care.

We wish to prepare our students for life so that they are ready to face challenges and unprecedented situations. At RED we wish our children to respect values like being honest, respecting others' opinion, being humble, coming to school well prepared, working in teams, respecting the rules of organization with understanding. Most importantly we use our school to be the training ground to teach our students the virtue of courage, that situations may go wrong but they must accept their mistakes with honesty. The value in focus is making them responsible and accountable for their actions and hence self correction. These are all Life Skills which will help them to be successful and responsible citizens.

Apart from lot of initiatives to bring in academic rigor in our system we are working on foundation and concept building for all subjects of all children like handwriting, presentation, studying consistently, peer learning. This makes learning process deep and permanent.

All these reforms implementation is easier said than done. However, confidence of implementing such ideas which are directly related to training of child in life skills, stems from the kind of support, respect, trust and affection showered by all worthy parents and grandparents upon RED.

I am really fortunate in receiving this in abundance and hopeful of getting it always. Our team will continuously strive for the character building and academic success of our students.

Mr. Jitender Singh Ahlawat
[Director, R.E.D. Society]

From Principal's Desk

We have completed yet another eventful academic session. New academic session marks new beginning, a lot of hopes and renewed aspirations.

Education is at the core of human development. The process is not about infusing information in the child's brain which stays undigested, all his life. We want every child to be learning wisely and enjoy learning process rather than making it a tiring and burdensome experience.

Academic excellence is main pillar of RED's foundation. This is exhibited by our children who have done us proud by excelling in the Board results. Through this newsletter we would like to share the achievements of our students.

I commend students for their earnest effort and hard work. Teachers' guidance and parental support had played a pivotal role in their achievements.

Allow me to share the secret for the success story of our children. Our examination system is particularly unique as it is customized to the needs of the children. Frequent and rigorous testing for section wherein children aspire for medical and engineering entrance exams right from Middle school. Regular feedback and support mechanism for students who are not so academically bright gives them confidence to perform. Further the bond between teacher and taught is very strong and yields result in terms of good grades.

We nurture our students as all rounded personalities. Very soon we will start with Evening Sports Academy for various sports. The training will be done by the trained and expert coaches. Further we have a strong activity program, clubs in the school system to help children explore their interests in co-curricular program.

Looking forward to a very positive and productive year together!
